**In the pursuit of perfection and innovation
Wave Armor created: Genesis**

The Genesis takes it all to the next level. It's another step above existing boat ports in the boat docking industry!

Engineered like no other the Genesis port is 2 piece design allows freedom of movement for (entrance) tail section in combination with new extra wide shock absorbing wheel dramatically changes docking experience. Self-Articulating section design provides better assistance during on/off loading process.

Created for boats in range between 1,500 and 3,600 lbs Genesis port can expand weight capacity up to 900 lbs utilizing buoyancy boosters that can be located in multiple locations (more info on pg 44)

Engineered with molded in large wheel pockets accommodating 6 inch and 8 inch wheel and guiding entrance roller for loading on assistance. Comes in 2 sizes 16 and 20 ft for different length boats. Interchangeable accessories and attachment kits with mounting options available for every fixed or floating dock application makes it the best choice for hassle free boat docking.
